Dick Wheeler
President ProExhibits

ProExhibits has been an Aluvision partner for many years now. We really enjoy working with this lightweight, smart and toolless system which allows us to create and build custom modular booths very easily. The reusability and durability of the Aluvision system also helped us to get through the 2009 financial crisis. Not only do we love the product, we also greatly appreciate the excellent support we get from the entire Aluvision team!
